PICKLED HAND AT I. U. MEDICAL CENTER

I went up to the Med Center when I was a senior in high school, and they were telling me about some of the boresses they pulled. This one girl went out one night, and some kids got an arm from one of the labs and put it in her bed with the hand sticking out--you know, like somebody was in the bed. Then they went away and waited for her to come in. They didn't hear anything for a long time; so they went back to see what had happened. And can you just imagine this: she had picked up the arm and they found her in the closet sitting on a laundry bag. And she was eating the arm! Her hair had turned completely white, she was so scared. They said that girl never will be able to come back to school.
